

Map

Cambridge IELTS 9 Test 1

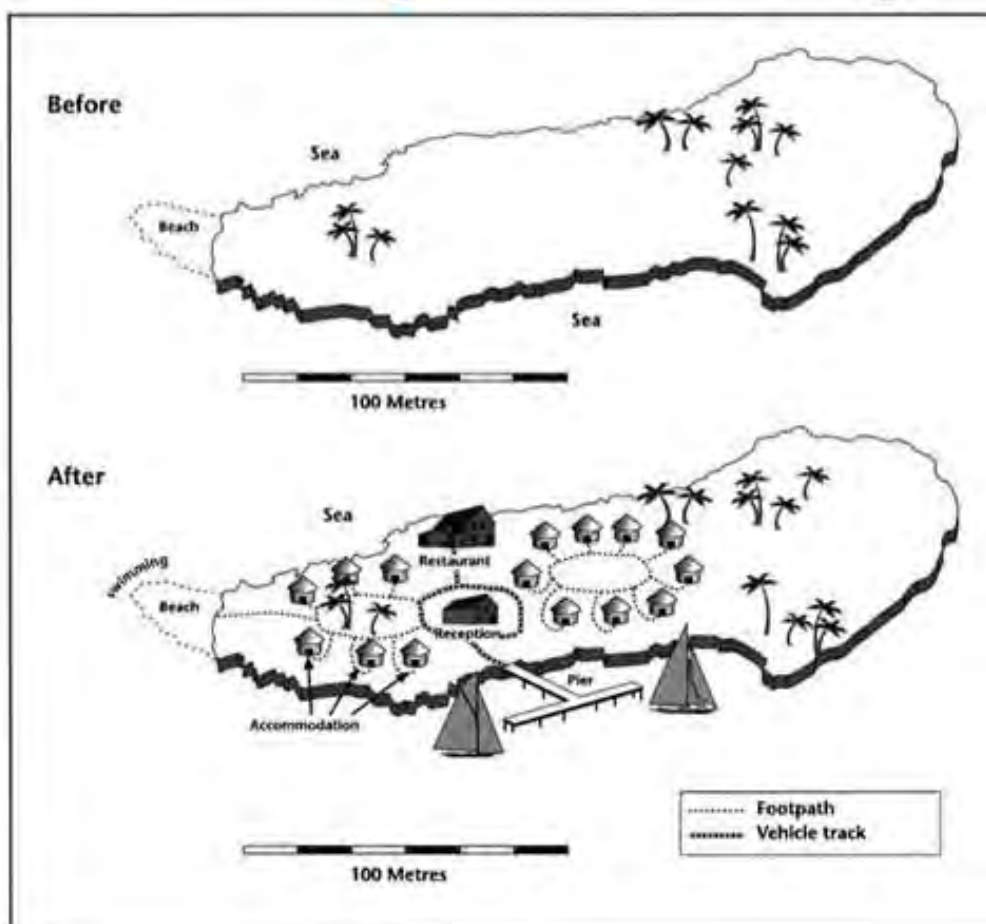

WRITING TASK 1

You should spend about 20 minutes on this task,

The two maps below show an island, before and after the construction of some tourist facilities.

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Write at least 150 words,

Sample Answer:

The maps compare the layout of an island before and after the development of tourist facilities. It is evident that significant changes have been made to accommodate visitors, transforming the once natural landscape into a fully equipped tourist destination.

Initially, the island was relatively undeveloped, featuring a beach on the west side and untouched vegetation across the rest. The only visible pathway was a track near the beach, suggesting minimal human impact. There were no buildings, piers, or other infrastructure to support tourism.

In contrast, the current map shows extensive development. Tourist accommodations have been constructed near the center of the island, complete with a reception area and a restaurant immediately adjacent to it. This central cluster of facilities is connected by footpaths to various parts of the island, ensuring accessible movement for tourists. Notably, a pier has been built extending from the reception area into the sea, likely to facilitate boat arrivals and watersports.

Moreover, vehicle tracks now run around the accommodations and restaurant, indicating increased accessibility and possibly service delivery routes. The beach area remains, but it is now more accessible and possibly enhanced for tourist use.

Overall, these developments suggest a shift from a pristine natural area to a commercial tourist hub, equipped with necessary facilities to support significant visitor numbers, thus potentially boosting local tourism revenue but also impacting the natural landscape.

Grammar and Vocabulary Activity:

Grammar Focus:

1. **Passive Voice:** Practice transforming active sentences into passive ones.
Example: "They built a pier" becomes "A pier was built."
2. **Comparatives and Superlatives:** Use these forms to describe changes. Example: "The island is now more developed than before."

Vocabulary Enhancement:

- **Synonyms for 'development':** Try using 'construction', 'expansion', or 'enhancement.'
- **Tourism-related terms:** Use words like 'accommodations', 'facilities', 'footpath', and 'pier' in different contexts.

Exercises:

Convert the following sentences to passive voice:

- "Developers added several new structures to the island."
- "Tourists use the new pier for watersports."
- Create sentences using comparatives:
- "The number of trees on the island now is less than before."
- "The developed area is more extensive than it was."

Use tourism-related vocabulary in a short paragraph about a hypothetical island development project. Include at least five of the suggested terms.

Cambridge IELTS 12 Test 6

WRITING TASK 1

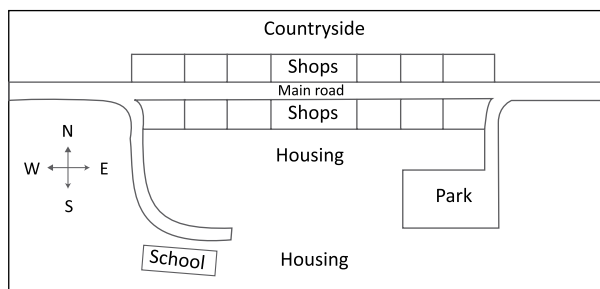

You should spend about 20 minutes on this task,

The maps below show the centre Of a small town called Islip as it is now, and plans for its development.

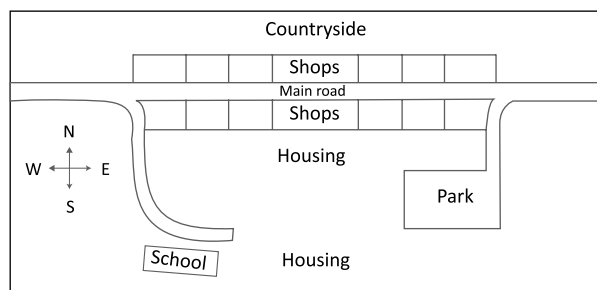

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Write at least 150 words,

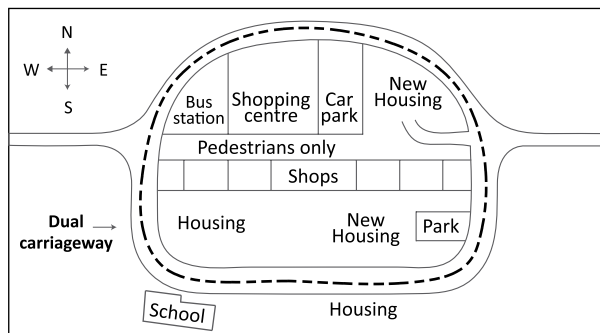

Islip town centre now

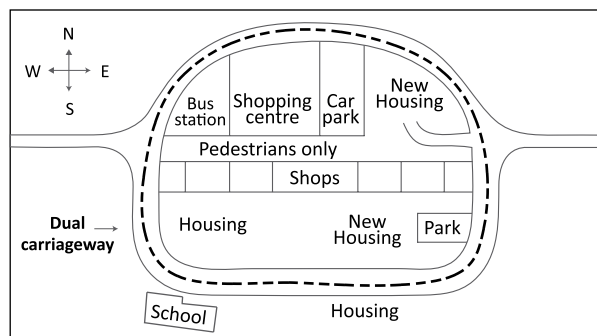

Islip town centre now

Islip town centre: planned development

Islip town centre: planned development

Sample Answer:

The maps illustrate the current layout and proposed development of the town centre of Islip, showing considerable changes aimed at modernizing the area and enhancing its functionality.

Currently, the town centre features a main road that runs from west to east, with shops located on either side. South of the main road is a row of houses, followed by a school which is directly to the south of these houses. The northern part of the map is bordered by countryside, while a park is situated to the northeast corner, adjacent to the housing.

The planned development of the town centre includes substantial alterations. The main road is to be transformed into a dual carriageway, enhancing transport capacity and flow. The shops will be retained in their current position along this new dual carriageway. Notably, the area directly north of the shops is to be pedestrianized and will also feature a new shopping centre, indicating a shift towards a more pedestrian-friendly environment.

Additionally, a bus station is planned on the western end of the pedestrian area, adjacent to a new car park, suggesting an emphasis on public transportation. South of the shopping area and across the dual carriageway, new housing will be constructed, which implies residential expansion. The existing park will be relocated to the southeast, making it more central in relation to the new housing and existing school, thereby likely enhancing accessibility for both residents and students.

Overall, the redevelopment plans for Islip town centre focus on traffic modernization, commercial expansion, and residential growth, reflecting an integrated approach to urban planning.

Grammar and Vocabulary Activities:

Grammar Activity:

1. **Passive Voice:** Transform active sentences into passive constructions to focus on the changes made to the town rather than who is making them. For example: "The town planners will transform the main road" becomes "The main road will be transformed by the town planners."
2. **Conditional Sentences:** Practice writing conditional sentences to discuss the potential effects of the new developments. For example, "If the main road is expanded, it might reduce traffic congestion."

Vocabulary Activity:

- **Synonyms for Urban Change:** Find synonyms for words like "developed," "expanded," and "modernized" to avoid repetition and enrich vocabulary.
- **Describing Locations and Directions:** Enhance descriptions of maps by using specific terms related to location and direction, such as "adjacent," "bordering," "eastern edge," and "directly south of."
- **Collocations with Development and Planning:** Use collocations related to urban development effectively, such as "urban planning," "residential expansion," "commercial area," and "pedestrianize."

Cambridge IELTS 13 Test 1

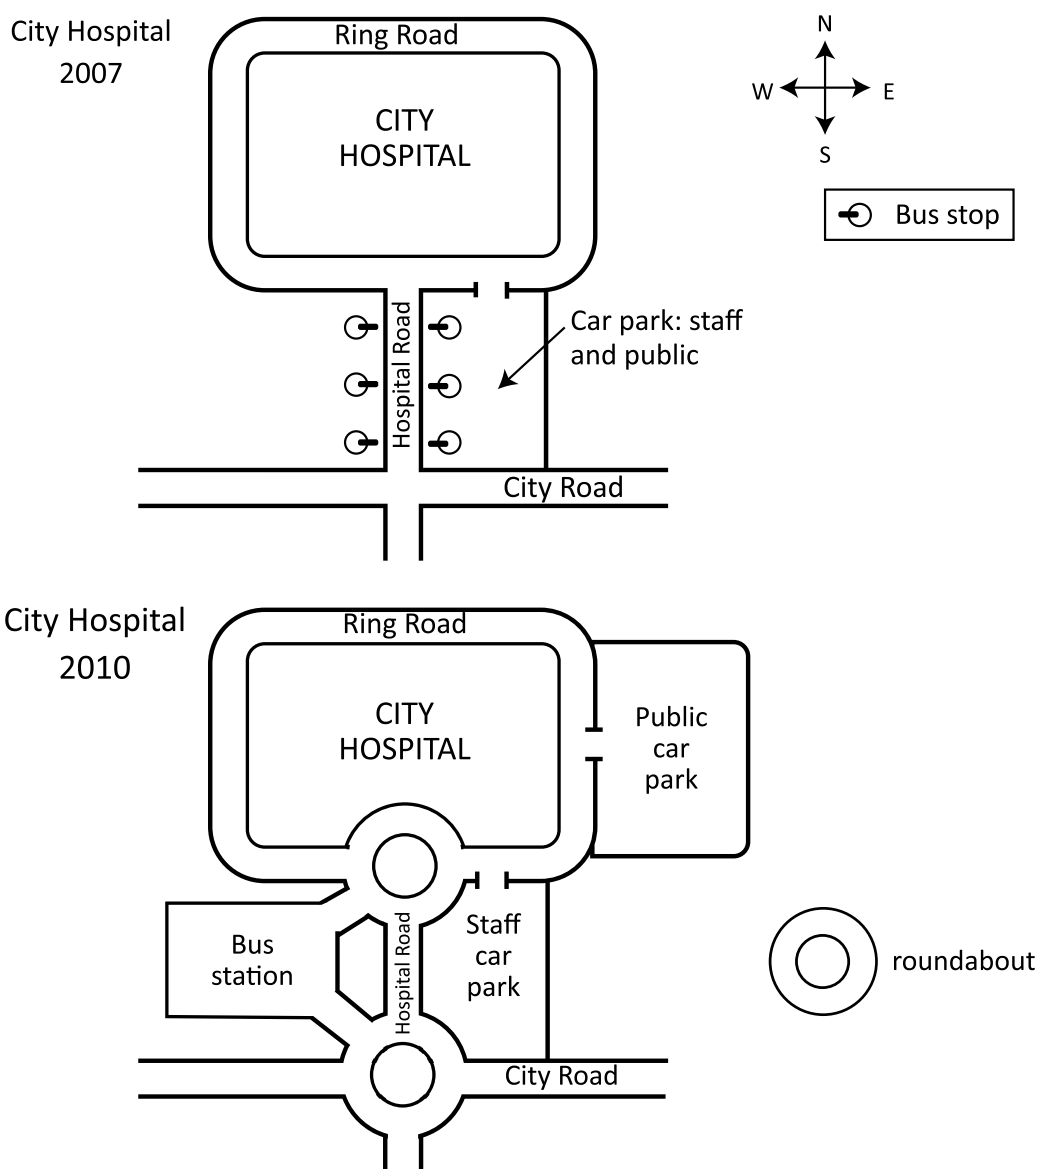

WRITING TASK 1

You should spend about 20 minutes on this task,

The two maps below show road access to a city hospital in 2007 and in 2010.

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Write at least 150 words,

Sample Answer:

The maps provide a comparative view of the road access to a city hospital between the years 2007 and 2010, illustrating significant infrastructure developments to accommodate traffic and improve accessibility.

In 2007, the hospital was accessible via a direct road linked to the Ring Road, with both the hospital and the road arrangements appearing relatively straightforward. The road, named City Road, led into a small parking area shared by staff and the public. To the east of the hospital, a simple bus stop facilitated public transport access.

By 2010, substantial changes were implemented. The road system was modified to include a roundabout, suggesting an aim to improve traffic flow and accessibility. City Road was extended to connect directly to the roundabout, which seems to streamline the approach to the hospital. The parking facilities were also expanded and segregated; a new public car park was constructed adjacent to the original parking area, now designated solely for staff. This separation likely reflects an increase in both staff and visitor numbers, necessitating more organized parking arrangements. Additionally, the public transport facilities were enhanced with the establishment of a dedicated bus station near the hospital, replacing the old bus stop. This upgrade would improve the capacity and efficiency of bus services for hospital visitors and staff.

These changes between 2007 and 2010 highlight a strategic development focused on improving the hospital's accessibility and managing increased vehicular and pedestrian traffic, which are critical for hospital functionality.

Grammar and Vocabulary Activities:

Grammar Activity:

1. **Passive Constructions:** Practice rewriting descriptions using the passive voice to emphasize the changes made rather than the agents of change. Example: "A roundabout was constructed to improve traffic flow."
2. **Time Clauses:** Develop sentences that use time clauses to describe when changes occurred, using phrases like "by 2010" or "between 2007 and 2010."

Vocabulary Activity:

- **Synonyms for Change and Development:** Identify synonyms for 'development' and 'change' to vary language use, such as "modification," "transformation," "evolution," and "alteration."
- **Describing Infrastructure:** Use specific vocabulary related to infrastructure, such as "roundabout," "bus station," "car park," and "traffic flow."
- **Adjectives Describing Improvements:** Encourage the use of adjectives that describe the nature of improvements, such as "substantial," "significant," "streamlined," and "enhanced."

Cambridge IELTS 13 Test 4

WRITING TASK 1

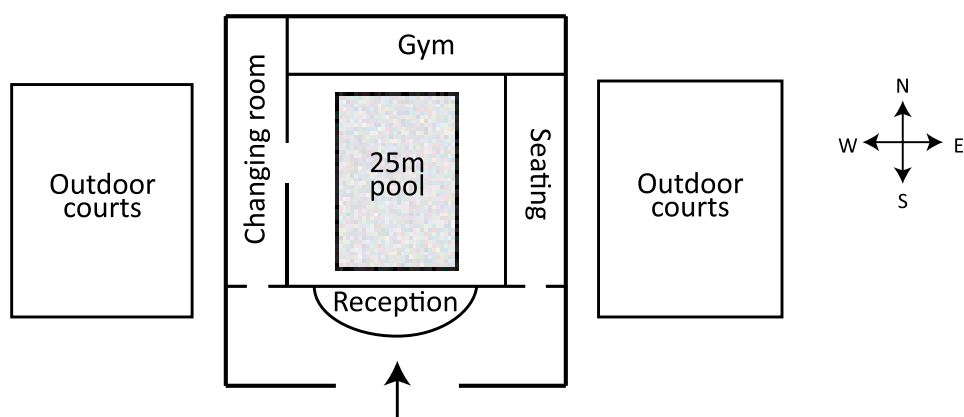

You should spend about 20 minutes on this task,

The plans below show the layout of a university's sports centre now, and how it will look after redevelopment.

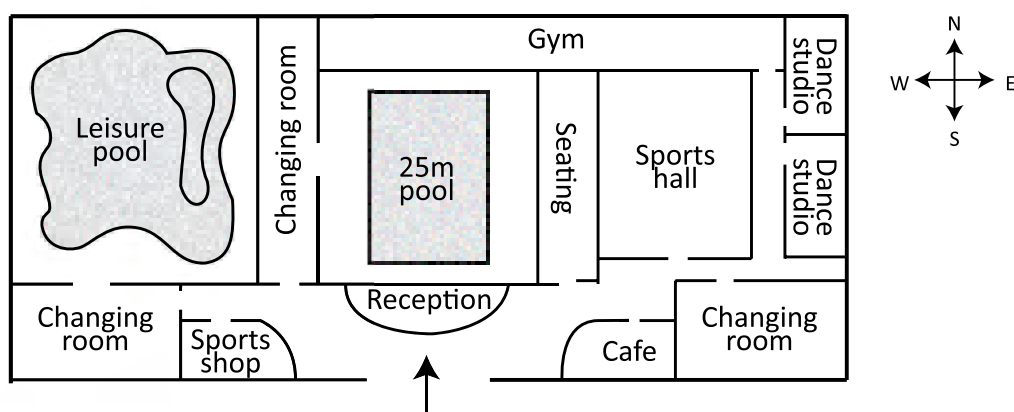

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Write at least 150 words,

UNIVERSITY SPORTS CENTRE (present)

UNIVERSITY SPORTS CENTRE (future plans)

Sample Answer:

The plans depict the current layout and proposed future redevelopment of a university sports center, illustrating significant enhancements and expansions in its facilities.

Presently, the sports center is structured with a 25-meter pool located centrally, flanked by a gym to the west and outdoor courts to the east. The entrance leads directly to a reception area, situated south of the pool, which provides access to all main facilities. North of the reception, there is a changing room that serves both the gym and the pool. This configuration supports a functional flow but is limited in terms of additional facilities and space for leisure activities.

The future redevelopment of the sports center shows a comprehensive redesign aimed at greatly expanding its capacity and the variety of activities offered. The gym remains in its original location to the west of the layout; however, it appears to be slightly more compact to accommodate additional facilities. The 25-meter pool also retains its central position but is complemented by a new leisure pool shaped irregularly, suggesting a focus on recreational as well as fitness swimming.

Significant new features include a sports shop adjacent to a revamped changing room area, which itself has been relocated to the southern edge, adjacent to a new café, enhancing the center's hospitality services. Additionally, a new sauna is integrated next to the gym, providing a wellness facility to the sports center's offerings. Perhaps most notably, the redevelopment plans include a sports hall and a dance studio to the north, indicating an expansion of indoor sports and activity spaces that were not previously available.

These changes are indicative of a shift towards a more diverse and community-oriented sports center, aiming to cater to a broader range of activities and potentially increasing student and staff engagement.

Grammar and Vocabulary Activities:

Grammar Activity:

1. **Modals for Speculation:** Practice using modals of probability (might, could, may) to discuss possible reasons for the redesign and its potential impact on users. For example, "The addition of a leisure pool may attract more students seeking relaxation options."
2. **Comparative Structures:** Write sentences that compare the current and future facilities using comparative forms, such as "bigger," "more accommodating," and "better equipped."

Vocabulary Activity:

- **Synonyms for Expansion and Addition:** Develop synonyms for 'expansion' and 'addition' like "extension," "enlargement," "augmentation," and "inclusion."
- **Terms Related to Sports Facilities:** Discuss and use specific terms related to sports facilities such as "leisure pool," "sports hall," "dance studio," and "sauna."
- **Descriptive Adjectives for Layout Changes:** Use adjectives to describe the layout changes effectively, such as "revamped," "redesigned," "enhanced," and "comprehensive."

Cambridge IELTS 14 Test 4

WRITING TASK 1

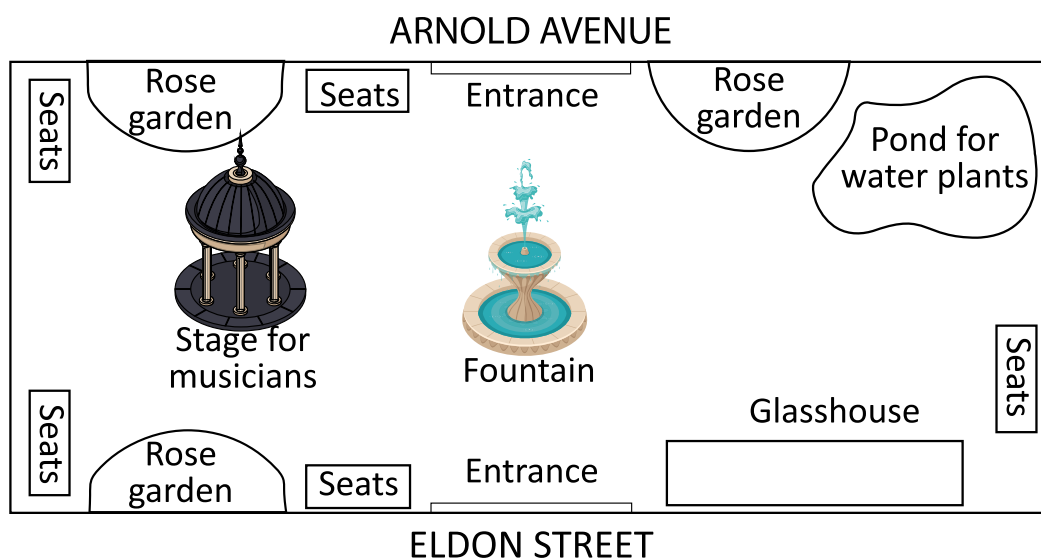

You should spend about 20 minutes on this task,

The plans below show a public park when it first opened in 1920 and the same park today.

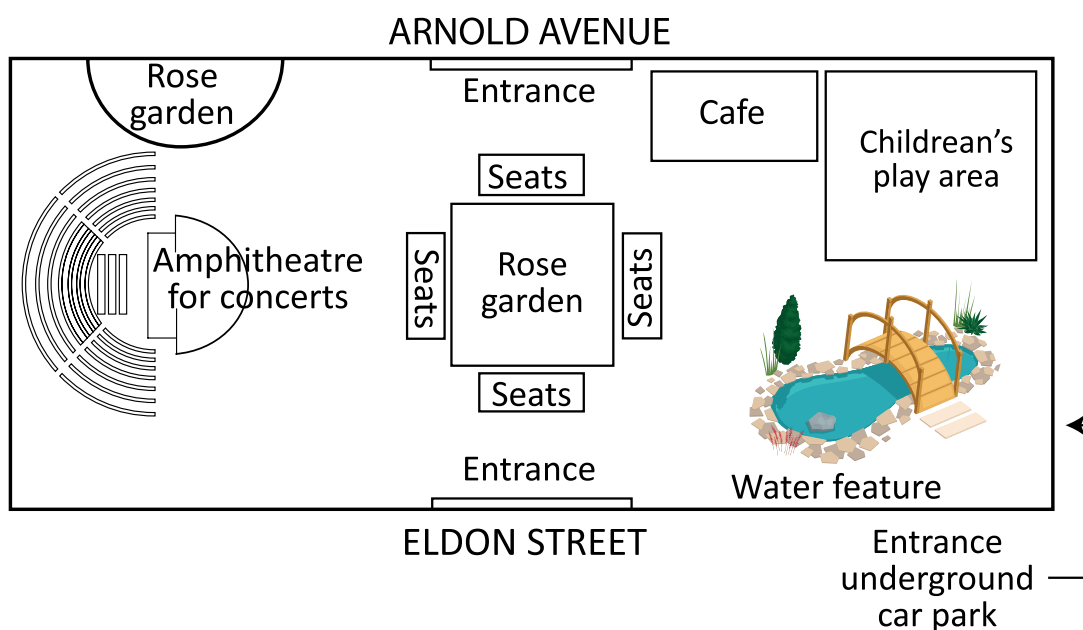

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Write at least 150 words,

GRANGE PARK (1920)

GRANGE PARK (today)

Sample Answer:

The plans compare the layout of Grange Park in 1920 with its current state, highlighting several modifications made over the years to adapt to contemporary needs and enhance visitor experience.

In 1920, Grange Park was laid out symmetrically with a central pathway leading from the Arnold Avenue entrance to the Eldon Street entrance. The park featured rose gardens symmetrically positioned on either side of the pathway near both entrances. Central amenities included a stage for musicians opposite the Arnold Avenue entrance and a fountain opposite the Eldon Street entrance. Additional seating was strategically placed throughout the park, and a glasshouse alongside a pond for water plants provided botanical attractions.

Today, Grange Park has undergone significant redevelopment. The stage for musicians has been replaced by a modern amphitheater for concerts, suggesting a shift towards more dynamic and inclusive public events. The rose gardens have been retained but are now flanked by additional seating areas, which indicates an effort to enhance the comfort of visitors. The central fountain has been removed and replaced by a children's play area, marking a shift towards family-oriented facilities. Moreover, a café has been added near the Arnold Avenue entrance, catering to the contemporary trend of including social amenities within public spaces. The pond has been transformed into a more formal water feature, and a new underground car park has been introduced beneath Eldon Street, reflecting the increased demand for parking due to visitor influx.

These modifications indicate a transition from a traditional decorative park to a multifunctional urban space that caters to both recreational and practical needs of the public.

Grammar and Vocabulary Activities:

Grammar Activity:

1. **Passive Voice Practice:** Write sentences about the park's changes using passive constructions, e.g., "The stage was replaced by an amphitheater."
2. **Comparative and Superlative Forms:** Use comparative and superlative forms to discuss the evolution of the park, focusing on the extent of changes, e.g., "The most significant change was the addition of a café."

Vocabulary Activity:

- **Synonyms for Change:** Use synonyms like "modified," "transformed," "redeveloped," and "revamped" to describe the park's evolution.
- **Park Features Vocabulary:** Discuss and use terms specific to park features, such as "amphitheater," "rose garden," "water feature," and "play area."
- **Descriptive Adjectives:** Employ adjectives to enhance descriptions of the park layout changes, such as "symmetrical," "contemporary," "dynamic," and "family-oriented."

Cambridge IELTS 16 Test 3

WRITING TASK 1

You should spend about 20 minutes on this task,

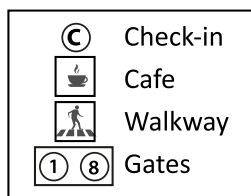

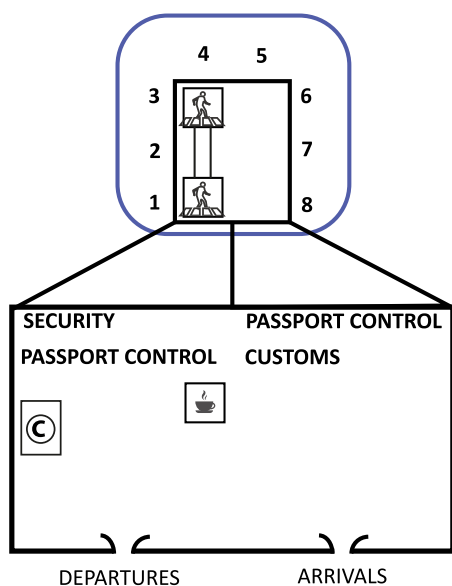

The plans below show the site of an airport now and how it will look after redevelopment next year.

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

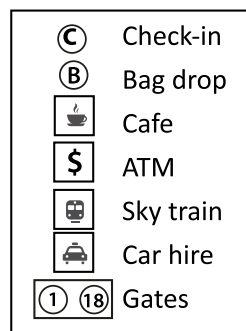

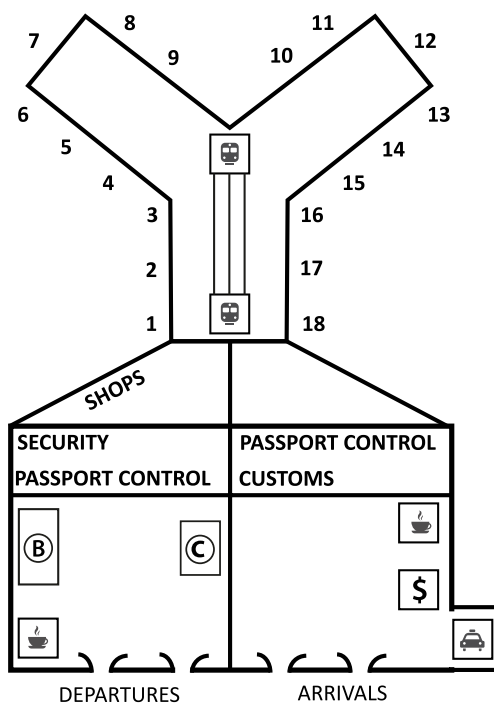

Write at least 150 words,

SOUTHWEST AIRPORT

NOW

AFTER DEVELOPMENT

Sample Answer:

The provided diagrams depict Southwest Airport's current layout and its anticipated redevelopment next year, illustrating significant changes intended to enhance operational capacity and passenger experience.

Currently, the airport concourse is structured in a straightforward, linear fashion with eight gates sequentially numbered from 1 to 8. Basic airport services including check-in, a café, and walkways are located prior to security checkpoints which lead to passport control and customs, facilitating a direct route for departing passengers. The gates are directly accessible following security clearance, arranged in a straight line that simplifies the boarding process but may contribute to congestion during peak times.

The redevelopment plans for next year show a transformation into a more sophisticated radial layout, expanding the number of gates to eighteen. This expansion is designed to distribute passenger flow more evenly and reduce bottleneck areas, potentially improving overall airport efficiency. The central hub will house enhanced security, passport control, and customs facilities, similar in function to the current setup but likely optimized for higher traffic. The introduction of additional services such as a sky train station, more shops, ATMs, and a car hire facility suggest a move towards a more comprehensive service offering aimed at improving passenger convenience and airport accessibility.

Each gate in the new plan is more spaciouly placed around the central hub, which should streamline passenger movement and provide quicker access to each gate from the newly introduced amenities. Notably, the addition of a sky train station indicates a commitment to better internal connectivity, facilitating faster transfers between gates and terminals.

Overall, the redevelopment of Southwest Airport is poised to significantly enhance its infrastructure by increasing capacity, improving passenger flow, and expanding services, which collectively aim to provide a more efficient and enjoyable travel experience.

Grammar and Vocabulary Activities:

Grammar Activity:

1. **Comparatives and Superlatives:** Practice rewriting sentences to include comparative and superlative structures that compare the features between the two maps.
2. **Passive Voice:** Focus on restructuring active sentences into passive form to emphasize the changes made by the planners rather than the planners themselves.

Vocabulary Activity:

- **Key Terms:** Expand vocabulary by finding synonyms for words like "layout," "facilities," "services," and "expansion."
- **Describing Changes:** Use phrases like "is poised to," "plans show," and "transformation into" to discuss future changes.
- **Adjectives and Adverbs:** Enhance descriptions with adjectives and adverbs such as "significantly," "streamlined," "sophisticated," and "evenly."

Cambridge IELTS 17 Test 1

WRITING TASK 1

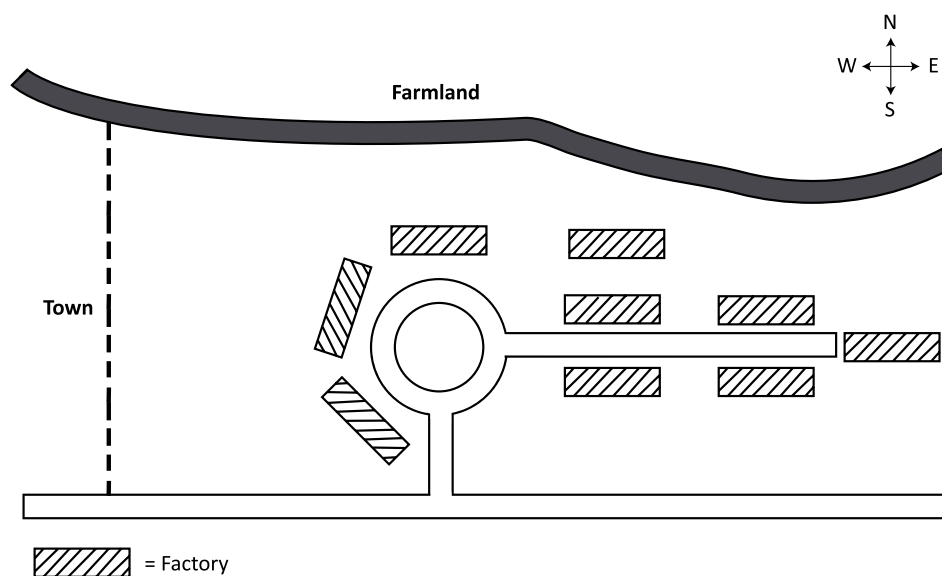

You should spend about 20 minutes on this task,

The maps below show an industrial area in the town of Norbiton, and planned future development Of the Site.

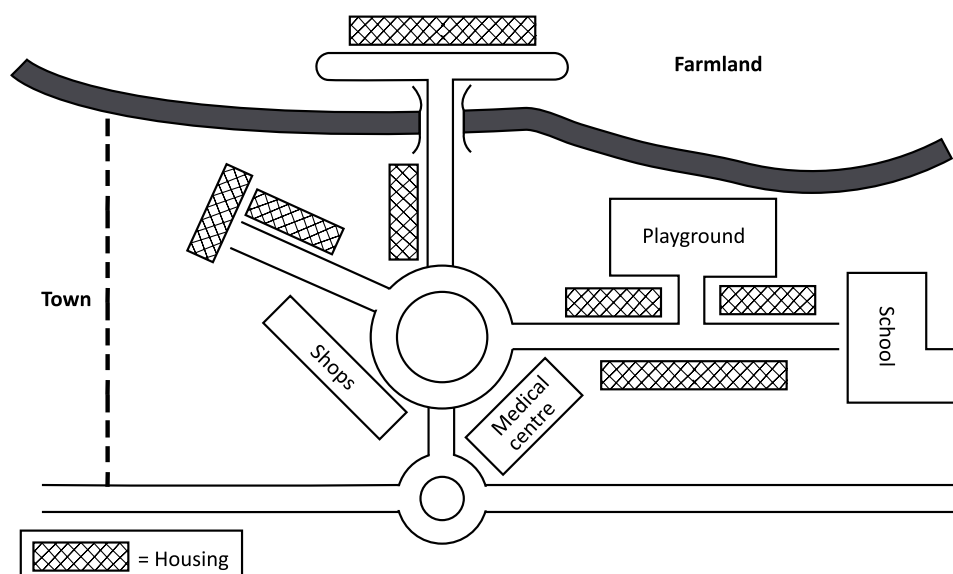

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Write at least 150 words,

Norbiton industrial area now

Planned future development

Sample Answer:

The maps provided display the current layout of an industrial area in the town of Norbiton and its substantial transformation planned for the near future.

Currently, the area features a straightforward layout with the town adjacent to the north side of the industrial site, separated by a clear boundary. The industrial site comprises several large buildings, possibly factories, organized linearly along a road that runs parallel to a river. The river curves around to the east where the area transitions into farmland, suggesting a mix of industrial and rural land uses.

The proposed development plan for this area indicates a significant shift towards a more community-focused and diversified usage. The industrial buildings are replaced by a mix of residential housing, a school, and a medical centre, which form a new neighborhood layout around a central roundabout, promoting accessibility and connectivity. This roundabout also connects to additional facilities including shops and a playground, positioned strategically to serve the new residential community. The proximity of these amenities to housing and educational facilities underscores a planned integration of living, shopping, and recreational spaces to enhance community well-being.

Further, the farmland to the east remains unchanged, maintaining the area's rural character, while the new development ensures that the natural beauty of the riverfront is preserved. This thoughtful planning suggests an effort to balance development with environmental and community wellness.

Overall, the transformation planned for Norbiton's industrial area is poised to significantly alter its character from an industrial zone to a vibrant residential and commercial hub, aimed at improving the quality of life for its residents and integrating more closely with the natural and social environment of the town.

Grammar and Vocabulary Activities:

Grammar Activity:

1. **Practice with Prepositions:** Write sentences using appropriate prepositions for locations shown on the map, such as "adjacent to," "along," and "around."
2. **Causative Forms:** Use the causative form to talk about development plans, e.g., "The town council has planned to have the factories replaced by residential units."

Vocabulary Activity:

- **Urban Planning Terms:** Discuss and find synonyms or related terms for urban development such as "zoning," "infrastructure," "amenities," and "urban renewal."
- **Descriptive Adjectives:** Use adjectives to describe the transformation such as "substantial," "integrated," "strategic," and "preserved."
- **Word Formation:** Focus on word formation from nouns to adjectives or verbs to nouns to expand vocabulary contextually, such as "development (noun) → developmental (adjective)."

Cambridge IELTS x Test x

WRITING TASK 1

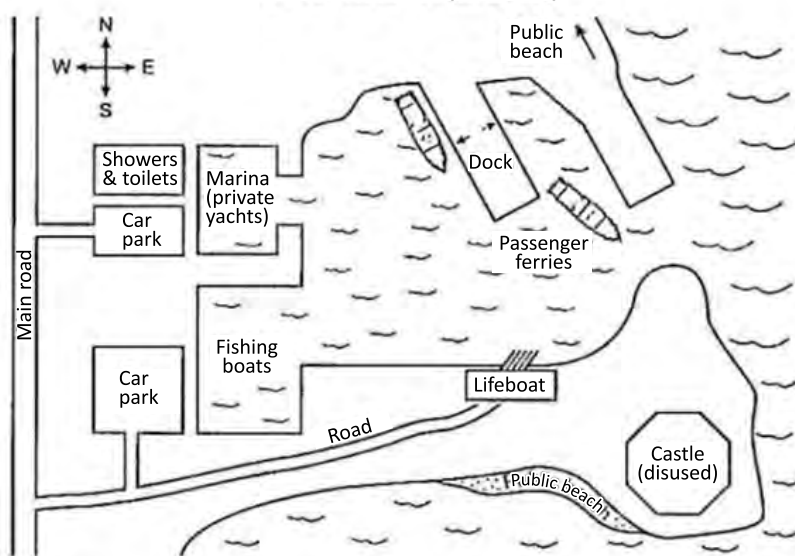

You should spend about 20 minutes on this task,

The plans below show a harbour in 2000 and how it looks today.

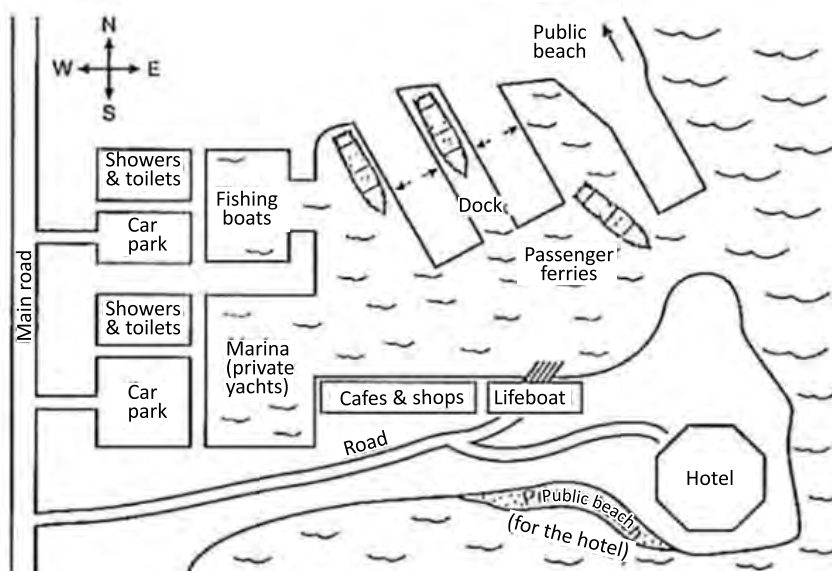

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Write at least 150 words,

Port Harbour (in 2000)

Port Harbour (today)

Sample Answer:

The provided diagrams depict the development of Porth Harbour over a span of approximately two decades, highlighting significant changes in the infrastructure and facilities.

In 2000, Porth Harbour was primarily structured with a central dock that catered to both marina activities and passenger ferries. Key facilities included showers and toilets, which were centrally located, and two separate car parks to accommodate visitors. Notably, the harbour hosted a designated area for fishing boats, a lifeboat station to the east, and a road that traced the harbour's perimeter facilitating access. Additionally, the presence of a public beach adjacent to a disused castle added historical and recreational value to the harbour.

Fast forward to the present, Porth Harbour has undergone substantial modifications to better serve its increased visitor and commercial traffic. The central dock remains but is now flanked by elongated piers extending into the sea, possibly to accommodate larger vessels and increase docking capacity. The marina for private yachts has expanded, replacing the area previously used by fishing boats, which suggests a shift towards a more leisure-oriented marine facility.

Moreover, new amenities including cafes and shops have been introduced, located near the showers and toilets, which have been retained in the same area but are now likely upgraded to cater to the increased footfall. A significant addition is the private hotel located on the previously unutilized land near the public beach, which indicates commercial development aimed at boosting tourism.

The lifeboat station remains a constant, emphasizing ongoing commitments to safety and emergency services. However, the road layout has been streamlined to perhaps allow smoother traffic flow and better access to the new facilities. The car parks are maintained in their original locations, ensuring that access for visitors is still prioritized.

Overall, the evolution of Porth Harbour reflects a strategic shift from a more utilitarian maritime focus to a commercially viable and tourist-friendly destination. These changes have potentially enhanced the local economy through increased tourism and improved marine services.

Grammar and Vocabulary Activities:

Grammar Activity:

1. **Past Simple vs. Present Perfect:** Students can practice using the past simple to describe the harbour in 2000 and the present perfect to discuss changes up to the current layout.
2. **Passive Voice:** Rewrite sentences from the description using the passive voice to focus on the changes made to the harbour, e.g., "The piers were extended to accommodate larger vessels."

Vocabulary Activity:

- **Nautical and Geographical Terms:** Enhance vocabulary with terms such as "dock," "pier," "marina," and "lifeboat station."
- **Adjectives for Change:** Use descriptive adjectives to compare the harbour's state in 2000 and today, such as "expanded," "streamlined," and "modernized."
- **Word Formation:** Practice forming nouns from verbs and adjectives related to development, e.g., "development" from "develop," "expansion" from "expand."
